

# About mod\_perl

General information regarding mod\_perl of historical interest.

Last modified Mon Nov 2 03:41:38 2009 GMT

## **Part I: Development**

- 1. The mod\_perl Project Management Committee  
the mod\_perl Project Management Committee (PMC) is a group of mod\_perl committers who take responsibility for the long-term direction of the project.
- 2. mod\_perl Contributors  
A list of people having helped mod\_perl along the way, and information about them
- 3. Companies sponsoring and supporting mod\_perl developers  
Several companies have contributed to mod\_perl by sponsoring mod\_perl developers and/or allowing their employees to work on mod\_perl as a part of their day job.
- 4. Other contributors to mod\_perl  
The other contributions made to mod\_perl, that we don't have enough information on.
- 5. History  
Since mod\_perl's inception in 1996, many things have changed, and it's interesting to look at mod\_perl's evolution and related events during the time from then to now.

## **Part II: Link to This Site**

- 6. Link to us  
A number of banners and buttons that can be used to link to the mod\_perl site

## **Part III: mod\_perl General Information**

- 7. How to pronounce mod\_perl  
Do you think that "mod\_perl" is a strange name and wondering about how to pronounce it?
- 8. License  
mod\_perl is an Apache Software Foundation (<http://www.apache.org/>) project, licensed under The Apache Software License, an Open Source license.

# **1 The mod\_perl Project Management Committee**

## 1.1 Description

the mod\_perl Project Management Committee (PMC) is a group of mod\_perl committers who take responsibility for the long-term direction of the project.

Today, the PMC consists of:

- **Adam Prime**
- **Ask Bjørn Hansen**
- **Doug MacEachern**
- **Fred Moyer**
- **Geoffrey Young**
- **Joe Schaefer**
- **Perrin Harkins**
- **Philip M. Gollucci**
- **Philippe Chiasson**
- **Randy Kobes**

For more information on the role of the PMC see [How How the ASF works](#)

## **2 mod\_perl Contributors**

There are thousands of people who have contributed to what mod\_perl is today. This file is here to recognize the tremendous efforts of the major contributors to the mod\_perl effort.

While Doug MacEachern is behind the majority of mod\_perl's design, code and documentation, he and mod\_perl never would have made it this far without the help from everyone in the mod\_perl community. His heartfelt thanks goes out to all of you!

This list is generated from a set of text files, and the contributors are sorted alphabetically.

Module authors aren't listed here, because keeping track of them would be too much work. For information about module authors, please refer to the Apache/Perl Module list.

## 2.1 Contributors

<b>Contributor</b>	<b>Activities</b>
Allan Juul	Site design.
Andreas Koenig	Early efforts, bug spotting, modules, documentation
Andrew Ford	mod_perl refcard, Apache::FakeRequest
Ask Bjørn Hansen	Modules, documentation, mailing lists
Bill Moseley	Site search, documentation.
Brian Behlendorf	Sysadmin
Doug Bagley	Bug spotting, modules.
Doug MacEachern	Architect and lead developer
Edmund Mergl	Modules
Eric Bartley	Method handlers, API, AIX fixes and Apache::AuthCookie.
Eric Cholet	Modules, debugging, documentation. Co-authoring Practical mod_perl
Frank Cringle	Documentation
Frank Wiles	Documentation and user help.
Fred Moyer	Documentation and code patches, user help.
Ged W. Haywood	Documentation and user help
Geoffrey Young	modules, documentation, development.
Gerald Richter	Embedperl, mod_perl 2.0 build system abstraction.
Gisle Aas	Original author of mod_perl. API enhancements/docs.
James G. Smith	mod_perl digest, various modules.
Jeffrey Baker	Previous maintainer of NT binary distribution. Apache::Session. Docs.
Jonathan M. Hollin	Site help.
Ken Williams	Modules, mailing list archives.
Lincoln Stein	CGI.pm, Apache::Request. Co-authored the Eagle book.
Mark Imbriaco	Original mailing list. First Apache:: module. Original Win95 build.

Mark Summerfield	documentation review.
Matt Sergeant	AxKit, documentation.
Patrick Kane	Original mod_perl FAQ.
Per Einar Ellefsen	Documentation, site help.
Perrin Harkins	Documentation. Some code patches.
Peter Tillemans	Win32 patches
Philip M. Gollucci	Documentation, modules, mod_perl 2.0 API renaming
Philippe M. Chiasson	mod_perl 2.0 contributions, mod_perl 1.0 maintainer, modules
Ralf S. Engelschall	ePerl, improved mod_perl install process.
Randy Harmon	documentation
Randy Kobes	Win32 maintainer
Richard A. Wells	documentation review
Rob Hartill	Second to run mod_perl in production. Testing.
Salvador Ortiz Garcia	bug fixing, API.
Stas Bekman	Documentation, modules, mod_perl 2.0 contributions, book, articles
Steve Reppucci	documentation review
Thomas Klausner	Original site design. Documentation re-organization.
Vivek Khera	Documentation. Apache::Sandwich
Wesley Darlington	Documentation.

## 2.2 Information

---

**Name:** Allan Juul

**E-mail:** lambretta (at) inet.uni2.dk

Allan's work on the design of this website has been of great benefit to us all. Not only did he give it good looks, but has also tirelessly worked to make it compliant with HTML and CSS standards, while still getting it to work with all browsers we could find.

---

**Name:** Andreas Koenig

**E-mail:** andreas.koenig (at) anima.de

**Lots** of bug spotting, fixing and patching since the early days. Andreas introduced the `Apache::Registry` that we all know and love. He put a great deal of time and effort into `CGI.pm` overhaul efforts (aka `CGI::XA` & `CGI::Switch`).

Various contributions to the Apache/Perl API. PAUSE efforts beyond the call of "duty". `Apache::Stage`, `Apache::GzipChain` and `Apache::UploadSrv` modules on CPAN. Andreas was the first to run mod\_perl on a production site, the Perl Authors Upload Server, aka PAUSE.

Andreas also contributed the "Correct HTTP headers" document.

---

**Name:** Andrew Ford  
**E-mail:** A.Ford (at) ford-mason.co.uk  
**URL:** <http://www.refcards.com/>

Andrew has made contributions to the `Apache::FakeRequest` module and is the author of the `mod_perl` refcard.

---

**Name:** Ask Bjørn Hansen  
**E-mail:** ask (at) apache.org  
**URL:** <http://www.askbjoernhansen.com/>

Author of the `Apache::DBILogger` and `Apache::UserTrack`, `mod_proxy_add_forward` modules, `mod_perl_method_handlers`.pod along with plenty of help testing cvs snapshots, documentation improvements, `Apache::StatINC` hacking and assisting with the `perl.apache.org` site. He is also the current maintainer of `Apache::DBI`.

Ask is also the maintainer of the `mod_perl` mailing lists, which is very helpful to the community.

---

**Name:** Bill Moseley  
**E-mail:** moseley (at) hank.org

Bill has helped out a lot with this site. He is the creator of the search engine, and has written various sections of the documentation here as well as contributed his wisdom to the design.

---

**Name:** Brian Behlendorf  
**E-mail:** brian (at) apache.org  
**URL:** <http://brian.behlendorf.com/>  
**Comments:** Infrastructure, baby!  
**Occupation:** CTO  
**Location:** San Francisco, CA, USA  
**Organization:** Collab.Net <<http://www.collab.net>>

Brian provides system administration support for `perl.apache.org` along with the mailing list and cvs repository.

---

**Name:** Doug Bagley  
**E-mail:** doug (at) dejanews.com  
**URL:** <http://www.bagley.org/~doug/>

Doug Bagley has pinpointed some of the nastiest mod\_perl bugs while claiming to know nothing about xs. He's also made improvements to the `Apache::SIG` module along with writing the valuable `Apache::SizeLimit` module.

---

**Name:** Doug MacEachern  
**E-mail:** dougm (at) apache.org

Doug released mod\_perl-0.50 in early 1996 and has been working on mod\_perl in one form or another since. He is currently employed by Covalent Technologies who sponsored his work fulltime on the initial design and implementation of mod\_perl-2.0. He is now working on other products at Covalent but continues to work on mod\_perl in a support role at Covalent and development in his spare time.

Doug has written most of the code and a solid part of the documentation for mod\_perl, and has also co-authored `Writing Apache modules with Perl and C` with Lincoln Stein.

---

**Name:** Edmund Mergl  
**URL:** <http://home.bawue.de/~mergl/>

Edmund wrote `Apache::DBI`; probably one of the most popular mod\_perl modules.

---

**Name:** Eric Bartley  
**E-mail:** bartley (at) pdn.cc.purdue.edu

Eric had a big hand in implementing and testing method handlers. He also contributed to some of the Apache/Perl API, along with making sense of some AIX mysteries for us. And, his `Apache::AuthCookie` module is an inspiration to us all.

---

**Name:** Eric Cholet  
**E-mail:** cholet (at) logilune.com  
**URL:** <http://www.logilune.com/eric/>

Author of `Apache::EmbperlChain` and `Apache::RefererBlock`. Involved with many heroic debugging sessions.

He has also written entire sections of the mod\_perl User's guide, and pointed out technical errors in it.

Eric is also co-authoring Practical mod\_perl with Stas Bekman, to be published soon by O'Reilly and Associates.

---

**Name:** Frank Cringle  
**E-mail:** fdc (at) cliwe.ping.de

Frank was the author of the mod\_perl FAQ (now merged into the documentation).

---

**Name:** Frank Wiles  
**E-mail:** frank (at) wiles.org  
**Location:** Lawrence, Kansas

Frank helps with documentation patches and helping users on the mailing list. He also maintains Apache::DB, Apache::DProf, Apache::SmallProf, and ModPerl::ParamBuilder.

---

**Name:** Fred Moyer  
**E-mail:** fred (at) redhotpenguin.com  
**Location:** San Francisco, California

Fred helps with documentation and code patches, and helping users on the mailing list. He also maintains Apache::Dispatch and has helped with releases for Apache::Reload, Apache::Test, and mod\_perl core.

---

**Name:** Ged W. Haywood  
**E-mail:** ged (at) www2.jubileegroup.co.uk

For reviewing and fixing the whole guide, providing lots of constructive criticism and helping to reorganize the guide to make it more user friendly.

Ged has also devoted time to help out users having problems on the mailing list.

---

**Name:** Geoffrey Young  
**E-mail:** geoff (at) modperlcookbook.org  
**URL:** <http://www.modperlcookbook.org/~geoff/>

Geoff has co-authored the mod\_perl Developer's Cookbook which seems to be getting good reviews. He has also written a few articles and the occasional Apache module.

Geoff works on mod\_perl for Ticketmaster.

---

**Name:** Gerald Richter

**E-mail:** richter (at) ecos.de

**URL:** <http://perl.apache.org/embperl/>

Gerald has helped us with various bug spotting and fixing over the years. His `Embperl` toolkit, specially designed to run under mod\_perl, has saved many lives.

He is now working on abstracting the mod\_perl 2.0 build system.

---

**Name:** Gisle Aas

**E-mail:** aas (at) sn.no

**URL:** <http://gisle.aas.no/>

Gisle wrote an early "proof-of-concept" `mod_perl.c` and `perl_glue.xs` on March 25, 1996 to be exact. While next to none of that code is present in the current mod\_perl source, as the embedded model and XS <-> Apache API interface were changed, it was an important inspirational kick start to what mod\_perl has become today.

Gisle has also contributed to mod\_perl's `Apache::Constants` module, along with API enhancements and documentation.

---

**Name:** James G. Smith

**E-mail:** jsmith (at) cpan.org

James took over the maintainership of the mod\_perl mailing list digest from Geoffrey Young, with whom it originated, and is now trying to send it off to the mailing list as often as he can.

He has also contributed a number of modules to the CPAN, such as `Apache::Handlers`, `Module::Use`, and `Uttu`, a web application framework.

---

**Name:** Jeffrey Baker

**E-mail:** jeff (at) godzilla.tamu.edu

Previous maintainer of the mod\_perl NT binary distribution and author of the `Apache::Session` module.

For his "guide to mod\_perl database performance" and many useful comments on the list that has been reused in the guide's material.

---

**Name:** Jonathan M. Hollin  
**E-mail:** netmaster (at) digital-word.com  
**URL:** <http://wypug.digital-word.com/>

Jonathan is using mod\_perl to create Shapeshifter, a Content Management System. He has been helping out the mod\_perl community through work on the website, especially for the logo contest.

---

**Name:** Ken Williams  
**E-mail:** ken (at) forum.swarthmore.edu  
**URL:** <http://mathforum.org/~ken/>

Author of the `Apache::Taco`, `Apache::SSI` and `Apache::Filter` modules. Ken's MathForum also hosts archives of some of the mod\_perl mailing lists.

Ken has also reviewed a lot of stuff in the guide. Many snippets from his emails are included in the guide.

---

**Name:** Lincoln Stein

**E-mail:** lstein (at) cshl.org  
**URL:** <http://stein.cshl.org/~lstein/>

Everybody knows Lincoln gave us the must-have `CGI.pm` module; he's put forth considerable effort into porting and optimizing it for mod\_perl. Lincoln also wrote the original `Apache::Request` module, a `CGI.pm`-like module on top of the Apache API.

As an addition to his great programming efforts, Lincoln has contributed his writing skills by co-authoring *Writing Apache Modules with Perl and C*, which has for a long time been the ultimate reference to mod\_perl programming.

---

**Name:** Mark Imbriaco  
**E-mail:** mark.imbriaco (at) pobox.com

For setting up the original mod\_perl mail list and administration of that list for two years. Mark was also the first person besides Doug to write an `Apache::*` module, the first version of `Apache::ePerl`. He was also the first person to build and run mod\_perl under Windows 95!

---

**Name:** Mark Summerfield

For reviewing and fixing all the guide's chapters, improving guide's readability and suggesting useful extensions.

---

**Name:** Matt Sergeant

**E-mail:** matt (at) sergeant.org

**URL:** <http://sergeant.org/>

Matt has written AxKit, the XML application server for mod\_perl. He has also contributed the section "Exception Handling for mod\_perl" for the perl reference chapter and made many other contributions to the documentation.

---

**Name:** Patrick Kane

**E-mail:** modus (at) pr.es.to

Patrick wrote the original mod\_perl FAQ.

---

**Name:** Per Einar Ellefsen

**E-mail:** pereinar (at) oslo.online.no

**Location:** Oslo, Norway

Per Einar has helped out with this website, for the most part through various documentation patches and additions, reviewing of documents, and maintaining some sections of the site.

He also tries to help out users having problems on the mailing list.

---

**Name:** Perrin Harkins

**E-mail:** perrin (at) elem.com

**Location:** Brooklyn, New York

Various documentation patches, `Apache::SizeLimit` patches, articles on templating modules and system architecture.

---

**Name:** Peter Tillemans

**E-mail:** pti (at) pandora.be

Peter helped bring mod\_perl up to Win32 speed with various patches including support for `make test`. He also maintained the Windows 95 binary distribution of mod\_perl.

---

**Name:** Philip M. Gollucci

**E-mail:** pgollucci (at) p6m7g8.com

**URL:** <http://www.p6m7g8.net>

Philip has been using Apache and mod\_perl since September of 1998. He has been actively contributing patches and testing things mainly on FreeBSD since January 2005. He also tries vainly to help people on the mailing lists.

In his non-existent free time, Philip maintains a few modules with Stas Bekman. You can view his CPAN directory [here](#). He also maintains several ports of CPAN modules for FreeBSD.

In November 2005, he joined the TicketMaster team.

---

**Name:** Philippe M. Chiasson

**E-mail:** gozer (at) ectoplasm.org

**URL:** <http://gozer.ectoplasm.org/>

Philippe has started working on the mod\_perl project in 1998, writing some Apache::\* modules on CPAN and eventually started helping out with mod\_perl 1.0 & 2.0 development.

In 2005, he joined the ranks of ActiveState's Perl Cult. He now spends a lot more time dealing with Perl itself instead of working on high-traffic websites for TicketMaster. Instead, he is now often busy building and debugging Perl things, including Perl, mod\_perl and all of CPAN (yes, all of it, regularly) on a large variety of platforms.

Philippe is also the current maintainer of mod\_perl 1.0.

---

**Name:** Ralf S. Engelschall

**E-mail:** rse (at) engelschall.com

**URL:** <http://www.engelschall.com/>

**Occupation:** Cable & Wireless Deutschland GmbH

**Location:** Munich, Germany

**Organization:** Private

Ralf, aka "Dr. Cosmetics", has greatly improved the mod\_perl configure/build/install process by implementing APACI, DSO and APXS support, along with various documentation enhancements. He has also written the `Apache::ePerl` module to enable mod\_perl support for his ePerl embedded Perl solution.

---

**Name:** Randy Harmon

For rewriting the mod\_perl advocacy chapter.

---

**Name:** Randy Kobes

**E-mail:** randy (at) theoryx5.uwinnipeg.ca

Randy Kobes has helped with the port of mod\_perl on Win32, and maintains binary and ppm packages of mod\_perl and related modules for that platform.

---

**Name:** Richard A. Wells

For reviewing and correcting a large part of the guide.

---

**Name:** Rob Hartill

**E-mail:** robh (at) imdb.com

Rob was the second to run mod\_perl in a production environment, and perhaps the best known mod\_perl site, the Internet Movie DataBase. He's also provided various bug fixes, enhancements and mail list support since the early days of mod\_perl. Always one step ahead testing mod\_perl against Apache cvs snapshots. It was Rob's kicking that made the mod\_perl CVS tree come to be.

---

**Name:** Salvador Ortiz Garcia

**E-mail:** sortiz (at) cfe.gob.mx

Salvador has helped bang out bugs and traps with *sfl* enabled mod\_perls, along with various bug spotting and stopping since the early days. He has also contributed to the Apache/Perl API.

---

**Name:** Stas Bekman

**E-mail:** stas (at) stason.org

**URL:** <http://www.stason.org/>

Stas has started contributing to mod\_perl in 1998 by creating the mini mod\_perl guide, simply to reduce the rate of broken record questions on the mod\_perl list. After a few years, some people still referred to the guide as mini, while it contained more than 600 pages at that time. As of today more than 200 users and developers helped Stas to write, review, improve and polish the guide.

While not working on the documentation and developing mod\_perl, at the remaining spare time, Stas has written a few Apache modules available from his CPAN directory and did some work on mod\_perl 1.0 series.

In autumn 2001 Ticket Master has kindly sponsored Stas for one year to help with mod\_perl. Stas used this time to help with the development of mod\_perl 2.0, to lead the creation of the new perl.apache.org site, to advocate mod\_perl via articles in popular online zines and conferences, to help with the mod\_perl list and as usual to write a lot of documentation, mainly for mod\_perl 2.0.

In autumn 2002 Ticket Master has extended the sponsorship for one more year, and the following year has done it again. As Doug MacEachern has shifted his focus on other things at the fall of 2002, Stas took the lead to continue the development of mod\_perl 2.0, greatly assisted by Geoffrey Young, Philippe M. Chiasson and other developers.

In 2003 Stas had the luxury to be sponsored by Ticket Master for yet another 1.5 years (making it a total of 3.5 years), at the end of which Stas has started the phase out process, opening the opportunity for other developers to take over the lead of the project.

Stas has co-authored Practical mod\_perl with Eric Cholet, published by O'Reilly and Associates in May 2003.

And of course, since 1998, when Stas discovered for himself mod\_perl, he was finding ways to use it at work, even while doing x86 hardware development and verification at Intel. He is now thinking about mod\_perl 3.0's architecture, hopefully to be implemented solely with AND and OR gates, driven by the Perl 6.0 chipset for the best performance. Don't be surprised when you get offered a shiny Bluetooth PCI card with embedded mod\_perl when you shop for your new server machine.

---

**Name:** Steve Reppucci

Steve did a thorough review of the information in the 1.x user guide. He fixed lots of spelling and grammar errors, and made the guide readable to English speakers :)

---

**Name:** Thomas Klausner

**E-mail:** domm (at) zsi.at

Thomas was the winner of the mod\_perl site redesign contest, although things have changed a lot since then. He also did a big documentation reshuffling which made it a lot easier for everybody.

---

**Name:** Vivek Khera

**E-mail:** vivek (at) khera.org

**URL:** <http://www.khera.org/~vivek/>

Vivek has saved many lives with his mod\_perl\_tuning.pod document, now merged into the documentation. He has also written the practical Apache::Sandwich module.

---

**Name:** Wesley Darlington

Contributed a big section of the scenario chapter.

---

This list was probably incomplete the moment it was created. We have done the best to our ability to make it as complete as possible. However, we aren't gods. So if you have contributed to mod\_perl, but aren't listed here, or want to change your information, please contact Per Einar Ellefsen with as much information as you can.

For a list of contributors for which we don't have enough information, make sure to visit this page.

## **3 Companies sponsoring and supporting mod\_perl developers**

## 3.1 Description

Several companies have contributed to mod\_perl by sponsoring mod\_perl developers and/or allowing their employees to work on mod\_perl as a part of their day job.

## 3.2 Companies

- **Critical Path**

Critical Path (<http://www.cp.net/>) has sponsored Doug MacEachern. (XXX: when?)

- **Covalent Technologies**

Covalent Technologies (<http://www.covalent.net/>) has sponsored Doug MacEachern. (XXX: when/what?)

- **TicketMaster**

From the fall of 2001 till mid-2005 TicketMaster (<http://www.ticketmaster.com/>) has sponsored Stas Bekman to work on the mod\_perl 2.0 development, documentation and the new perl.apache.org site (completed in 2002).

## 3.3 Maintainer

The maintainer is the person you should contact with updates, corrections and patches.

- Stas Bekman [<http://stason.org/>]

## **4 Other contributors to mod\_perl**

## 4.1 Description

The other contributions made to mod\_perl, that we don't have enough information on.

There are **many** other people who have contributed a great deal to mod\_perl in one way or another, this list is derived from the Changes file, activity on the mod\_perl list including support, suggestions and new ideas, along with help through private mails or other means.

This list is most likely incomplete. My apologies if that is the case, please send me an email if you have been left out and your contribution will be recognized!

If you do not feel you've made a contribution, remember that your help is always welcome and appreciated. You should consider yourself a contributor to the mod\_perl effort even if you are simply using mod\_perl!

## 4.2 The Apache and Perl communities

If there was no Apache, there would be no mod\_perl. See the Apache contributors list at <http://httpd.apache.org/contributors/>.

If there was no Perl, there would be no mod\_perl. Perl authors are credited in the distribution's *AUTHORS* file.

We owe a great deal of thanks to The Apache Group, Larry Wall and the perl5-porters, along with the communities that support them both.

## 4.3 Contributors

The contributors that are listed here only come by name, as we don't have enough information about them. These people have mostly submitted small patches to the code or to documentation, which have been very appreciated by the community. Some others have helped through the mailing lists, supporting users.

- **Aaron Johnson**
- **Adam Laurie**
- **Ajay Shah**

## **5 History**

## 5.1 Description

Since `mod_perl`'s inception in 1996, many things have changed, and it's interesting to look at `mod_perl`'s evolution and related events during the time from then to now.

Based on the `mod_perl Changes` file and talks with `mod_perl` developer's, we have here reconstructed the important steps in the development of this successful Open Source project.

## 5.2 Beginnings

The first version of `mod_perl` was written by Gisle Aas and released on March 25, 1996. The effort was instantly recognized by Doug MacEachern and Andreas Koenig; the former had been working on Perl embedding. They picked up the torch and brought the project we all love to what it has become today, thanks to the help of countless contributors.

An extract from *Changes* (the first one):

```
=item March 25, 1996

Initial version of mod_perl.c and perl_glue.xs
by Gisle Aas <aas (at) oslonett.no>
Thanks for getting this started Gisle!
```

Andreas Koenig tells us about how things happened:

"It was a time when FastCGI was still considered cool. But making FastCGI work required a patched perl, since tied file handles were still in their infancy.

"PHP was also around already, and was an embarrassing witness to Perl's greatest weakness for server-side programming: that embedding Perl was a pain. Although the hooks were there for embedding Perl, they were both undocumented and buggy.

"Doug MacEachern first got involved by addressing these problems. He wrote documentation for embedding Perl (the `perlembed` manpage) and fixed a couple of bugs. Then one day, Gisle Aas posted on `perl5-porters` that he had built Apache with an embedded Perl interpreter as a proof-of-concept. However, Gisle lacked the time for further work.

"That announcement was like a lightning bolt for at least two guys: Doug and me. While Doug shuffled the C code, I wrote the first working *Makefile.PL*, or at least I smoothed the build process to reduce the error rate resulting from silly mistakes during installation. Doug was working on HP-UX and I was using IRIX, so Doug wrote `ExtUtils::Embed` to generate the command line arguments for `gcc` that tie things together for embedded applications.

"Early versions of `mod_perl` needed to be recompiled to add a single CGI application. To get over that, I invented something without a name that mapped filenames to perl package names. When Doug received it, he called it `Apache::Registry`, as noted in *Changes*:

```
=item release 0.75a1 - July 21, 1996
```

```
added Apache::Registry module contributed by
Andreas Koenig <andreas.koenig (at) franz.ww.tu-berlin.de>
```

"From that moment in July 1996, we could count on a number of interested developers on the mailing list to test the nascent `mod_perl`. The *Changes* file mentions a few of them: Salvador Ortiz, Alan Beale, and John Detloff. Rob Hartill of IMDB fame joined us in July. (See contributors for more information.)

In August 1996, time was ripe to let a production server run `mod_perl`, and PAUSE (the Perl Authors Upload Server) was the first such server. We still had to use `$r->print`, and couldn't "use CGI", but we could add and remove scripts without recompiling and we were happy. Being unable to use the popular `CGI.pm` module turned out to be a pain for us, so I wrote a complete `CGI.pm` clone, `CGI::XA` and hoped that Lincoln would pick up the ball once there was a working alternative implementation. Eventually, Lincoln (with the encouragement of Mike Stok) made `CGI.pm` compatible with `mod_perl` starting with `CGI.pm 2.32`, and in March 1997, `CGI::XA` was removed from the `mod_perl` distribution. This was one of the most important entries into the *Changes* file:

```
=item 0.95 - 03/20/97
```

```
*****
*** CGI-XA/* removed from distribution ***
CGI.pm-2.32 is now mod_perl compatible, and
now ships with CGI::Switch and CGI::Apache.
*****
```

Can you feel the relief it was for Doug to write that? I think this was the greatest day of the whole development. One year of very tough work got the reward it deserved.

After that, `mod_perl` started to get attention from an increasing number of users. Doug worked like mad on fixing bugs and inventing one thing after another, just as he still does today. Things started flowing and people sent in patches, so Doug got the impression that the bazaar model was beginning to work. (From Eric Raymond's essay "The Cathedral and the Bazaar," the unofficial manifesto of the Open Source movement.)

I remember one day Doug got a confidential message from a Sun employee. They had made an investigation on "where the web is heading", and they had come to the conclusion that "`mod_perl` will have an impact on the whole Web".

## 5.3 Up to 1.0

The first public release after Gisle's proof-of-concept happened on May 1, 1996: release 0.50a1 of `mod_perl`, with a long list of changes.

In 0.50a2, an alternative implementation was provided, `mod_perl_fast`, which became the standard in 0.83\_10.

Another probably important change was the possibility of using `print` instead of `$r->print`, greatly facilitating output generation:

```
=item release 0.80 - September 06, 1996
[...]
```

```
we now take advantage of Perl's new IO abstraction so STDIN and
STDOUT are hooked up to the client.
Thanks to Sven Verdoolaege <skimo@breughel.ufsia.ac.be> for the
initial patch
```

With 0.85 came the start of the test suite!

```
=item 0.85

added the start of a mod_perl test suite
```

Another interesting feature was added just before 1.0: stacked handlers!

```
=item 0.95_02

introduced experimental "stacked handlers" mechanism, allowing more
than one Perl*Handler to be defined and run during each stage of the
request.

Perl*Handler directives can now define any number of subroutines, e.g.

PerlTransHandler OneTrans TwoTrans RedTrans BlueTrans

with a new method, Apache->push_handlers can add to the stack by
scripts at runtime
```

And just after that, our beloved `<Perl>` sections!

```
=item 0.95_03
[...]
```

```
added <Perl> config section (see httpd.conf.pl)
(needs 'perl Makefile.PL PERL_SECTIONS=1')
```

Finally, more than one year after Doug's original 0.50a1, 1.0 was released on July 28 1997:

```
=item 1.00 - 07/28/97
```

It primarily began adapting to the 1.3 series of Apache.

## 5.4 1.x development

## 5.4.1 Core

During 1.x development, there has generally been many bug fixes and adaptations to Apache and Perl versions, striving to remain compatible. Some parts stand out as pretty important.

In v1.12, the important APACI-support was added thanks to Ralf S. Engelschall:

```
=item 1.12 - June 14, 1998
```

```
added new (but still optional!) Apache 1.3 support via the new Apache
Autoconf-style Interface (APACI): The option USE_APACI=1 triggers a new
build-environment (from local apaci/) for the APACHE_SRC/src/modules/perl/
which provides a clean way (i.e. without patching anything inside APACHE_SRC,
not even the Configuration file) of configuring mod_perl via a
APACHE_SRC/src/modules/perl/mod_perl.config file. The complete configuration
is enabled by just using the APACI command "configure
--activate-module=src/modules/perl/libperl.a"
[Ralf S. Engelschall <rse@engelschall.com>]
```

And with new versions of Perl come new fixes to mod\_perl of course.

```
=item 1.22 - March 22, 2000
```

```
compile fixes for 5.6 + -Duse5005threads
[Lincoln Stein <lstein@cshl.org>]
```

But the most important happenings weren't the bug fixes in the mod\_perl core, but all that happened around it. The usage statistics show an incredible boom in mod\_perl deployment, which has been accompanied by the release of very interesting applications and frameworks for mod\_perl.

## 5.4.2 Related events

Maybe even more interesting are the things happening around mod\_perl, mainly concerning Perl and Apache. The reason is that this impacts as much on mod\_perl users as the changes to mod\_perl itself; for example, a bug fix in Perl will help a lot to someone writing Perl handlers, and a security fix in Apache is of immense benefit to *anyone* running an Apache server.

*Writing Apache Modules with Perl and C* (<http://www.modperl.com/>), by Lincoln Stein and Doug MacEachern, for a long time considered the best resource for mod\_perl programmers, was published in March 1999 by O'Reilly & Associates. While not the only book on the subject, it is still a must-have for any serious mod\_perl programmer.

At ApacheCon in Orlando in 1999, mod\_perl officially became an Apache Software Foundation project, and Ask Bjørn Hansen, Eric Cholet and Stas Bekman were voted in as ASF members in addition to Doug MacEachern. Together they formed the mod\_perl PMC.

In March 2000, Perl 5.6.0 was released, bringing many new features to Perl and mod\_perl programmers the world over.

In October 2000, Take23 (<http://www.take23.org/>) was created as an alternative site for mod\_perl, because of the back-and-forth discussions about re-designing the *perl.apache.org* site weren't going anywhere at that time. It collected news and articles about mod\_perl and also related issues such as other interesting Apache modules. It wasn't maintained for several years, and somewhere in 2003 it has disappeared.

Also in October 2000, Geoffrey Young got the idea to begin a mod\_perl mailing list digest (see <http://marc.theaimsgroup.com/?l=apache-modperl-dev&m=97051473628623&w=2> and <http://marc.theaimsgroup.com/?l=apache-modperl&m=97059662005378&w=2> ), which he kept up regularly (weekly, then biweekly) up until late 2001, when James G. Smith took over and has been running it since then.

The *mod\_perl Pocket Reference* (<http://www.oreilly.com/catalog/modperlpr/>), by Andrew Ford, was published by O'Reilly and Associates in December 2000. It summarizes the whole mod\_perl API as well as configuration directives and some other tips in an easy-to-use format.

In January 2002, the *mod\_perl Developer's Cookbook* (<http://www.modperlcookbook.org/>), authored by Geoffrey Young, Paul Lindner and Randy Kobes, was published by Sams Publishing. It presents the mod\_perl API by example, teaching a programmer all the facets of mod\_perl installation, programming and configuration, and is a valuable resource to everyone.

META:

- mailing list creations
- beginnings of new site
- conferences w/ mod\_perl present
- when Doug and Stas funded? Stas: August 2001; end 2002

## 5.5 The arrival of 2.0

...

## 5.6 Future directions for mod\_perl

mod\_perl has clearly shown its strength as an Open Source project and application development platform. mod\_perl 2.0 has been a jump forward, but with the arrival of Perl 6 we might expect another new version of mod\_perl. If the developers are still interested, that is. There has been started development on mod\_parrot ([http://svn.perl.org/parrot-modules/mod\\_parrot](http://svn.perl.org/parrot-modules/mod_parrot)), but Perl 6 is far from ready, so we don't really know what will be needed. The future hold great things for us.

I will quote Stas Bekman's commentary in the contributors list:

*"He is now thinking about mod\_perl 3.0's architecture, hopefully to be implemented solely with AND and OR gates, driven by the Perl 6.0 chipset for the best performance. Don't be surprised when you get offered a shiny Bluetooth mod\_perl 3.0 PCI card when you shop for your new server machine."*

Who knows?

To link to this website using one of the above banners or buttons, **download** the image file, then insert the following HTML into your document, replacing *FILENAME* with the correct file name, and *WIDTH* and *HEIGHT* with the correct dimensions :

```
<p>
<a href="http://perl.apache.org/">

</a>
</p>
```

**Note:** *Please* make sure that you download the button/banner locally and use that one, and don't use the complete URL to the graphics hosted on this site; it'll slow your site down and use up our bandwidth.

The main versions of the buttons and logos are provided in the GIF format, as PNG still has a tendency to crash old browsers. If you feel comfortable about using the PNG versions, please go ahead and do so.

Many other logos and buttons have been created for mod\_perl. If you are interested in some of them, you may download an archive containing them all.

## **7 How to pronounce mod\_perl**

## 7.1 Description

Do you think that "mod\_perl" is a strange name and wondering about how to pronounce it?

## 7.2 "mod\_perl"

Over the years there have been many people complaining about "mod\_perl" being an unsuitable name for this product and it's hard to "sell it" to their bosses. However, the name has a long tradition and is here to stay.

The "mod\_" part comes from the prefix all Apache modules have: mod\_rewrite, mod\_dir, etc. If you look at the DSO filenames you'll see that they are all like "mod\_XXX.so". This is also the case for mod\_perl.

As for the "perl" part, the origin is pretty obvious.

The name is straight to the point and clearly describes what the application does. Those who have requested a change of name have never obtained it, often for the simple reason that "If you can't sell mod\_perl to your boss based on its technical merits, the name is the least of your worries".

## 7.3 Pronunciation

One issue still remains: how are we supposed to pronounce this name?

In phonetic (AHD, see <http://www.dictionary.com/help/ahd4/pronkey.html>), mod\_perl looks like:

**môd·pûrl**

The underscore marks a slight pause between the "mod" and "perl" parts.

Below we have collected recordings of mod\_perl developers around the globe pronouncing mod\_perl.

Name	WAV	MP3	Ogg	Vorbis
Per Einar Ellefsen	<a href="#">Listen</a>	<a href="#">Listen</a>		<a href="#">Listen</a>

## **8 License**

## 8.1 Description

mod\_perl is an Apache Software Foundation (<http://www.apache.org/>) project, licensed under The Apache Software License, an Open Source license.

## 8.2 The Apache Software License

The license is available in the file *LICENSE* in the source distribution. We have also reproduced it verbatim below:

=====

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

- 5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
- 6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
- 7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any

risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
